Stricter scrutiny for FDI from Hong Kong

Responding to a question if indirect investments from Hong Kong will also be subject to a treatment akin to Press Note 3 (under which FDI from China and other bordering nations requires government approvals), the CEA said: "Investments that are coming from across the border, from the country with which we have tensions right now, need to be scrutinised, and those include not just the direct but also indirect ones."

It's not immediately clear if these curbs could be extended to foreign portfolio investors (FPIs) as well, in which case the implications will be much larger. Currently, there are 111 registered FPIs from Hong Kong and 16 from China. FPIs are among the biggest drivers of the Indian financial markets, as net FPI inflows in 2019 stood at \$18 billion.

Speaking at a Ficci event, Subramanian also highlighted the need to ensure

bankers are not pulled up later for honest business transactions in the course of resolution of toxic assets under the Insolvency and Bankruptcy Code, especially on the critical issue of haircuts.

"There is always a possibility of hindsight bias, which can create enormous risk aversion. If a decision is read as a possible mala fide intent, that can also make bankers skittish in being able to take that judgment," Subramanian said. He also called for the creation of a market to discover the price of distressed assets.

As for greater monitoring of Chinese investments, India on April 18 tightened its FDI policy to curb "opportunistic acquisitions" of domestic firms that saw a massive crash in valuations after the Covid-19 pandemic. It stipulated that all FDI proposals from bordering nations would require government clearance. Importantly, the notification also covers any transfer of investments or future FDI resulting in beneficial ownership falling with firms from the bordering nations, including China.

FDI from Hong Kong stood at \$4.51 billion

From the Front Page

growth projections showing Bangladesh closing in on India in terms of per capita GDP this year and described it as a "solid achievement" of six years of BJP's "hate-filled cultural nationalism".

The government sources, on their part, emphasised that under the Modi government, the per capita GDP has increased from ₹83,091 in 2014-15 to ₹1,08,620 in 2019-20, representing an increase of 30.7%.

In 2019, India's GDP in Purchasing Power Parity (PPP) terms was 11 times more than that of Bangladesh while population was eight times more. In PPP terms, India's per capita GDP in 2020 is estimated by IMF at \$6,284 compared with \$5,139 for Bangladesh, according to the sources.

Under UPA-2, the sources said it had increased from ₹65,394 in 2009-10 to ₹78,348 in 2013-14, which is an increase of 19.8%.

The International Monetary Fund (IMF) has estimated India's GDP to grow at 8.8% in 2021, twice that of Bangladesh at 4.4%, they added.

According to IMF, India is set to drop below Bangladesh in terms of per capita GDP as the economy is projected to contract by a massive 10.3% this year.

IMF's forecast for India -- a huge downward revision from its previous prediction in June -- is also the biggest contraction projected among major emerging markets amid the Covid-19 pandemic.

However, India is likely to bounce back with an impressive 8.8% growth rate in 2021, thus regaining the position of the fastest growing emerging economy, surpassing China's projected growth rate of 8.2%, the IMF said in its latest 'World Economic Outlook' report.

IMF, in its report, said revisions to the forecast are particularly large for India, where GDP contracted much more severely than expected in the second quarter.

"As a result, the economy is projected to contract by 10.3% in 2020, before rebounding by 8.8% in 2021," it said. In 2019, India's growth rate was 4.2%.
